**NOTE:** The engines were submerged under **fresh water** overnight before discovered. Following this immersing, the following engine service was performed in an attempt to correct any damage:

- Oil changed
- Gear lube replaced twice
- Fresh water purged from the spark plugs
- Spark plugs replaced with new

The engines were remounted and ran for about 5-10 hours before more problems began with the electronics.

One engine needs a new starter. The other engine has a belt tensioner problem.

Engines are in poor condition, other unknown repairs may be required.

## LOADING NOTES:
